

REAL

(Re-sealable End Application for Liquids)

What the Industry Needs...

Finally, a can, can be sealed from carbonated drinks to solid goods. REAL adds the advantage of being system compatible. For the same cost, or less to the limited one time open option "SOT", you can now close your can with REAL. A real option for the can world!

System Compatibility + Re-Sealable = \$\$\$

Follow the Demand...

Cans are in and plastic is out. The market is demanding options to replace the damaging effects that plastic has on our environment. A can takes 30% less space to transport, has the largest recycling rate, insures maximum product quality experience and has an unmatched product display.

REAL has what it takes

Easy to open, REAL is provided with a visual seal indicating the can has been opened. To open REAL, simply turn the top lid 90°, reverse the same action to close. That's it!. Free of sharp edges, REAL makes a can safe and easy for all to use.
